SUMMARY

I'm a freshly graduated computer science engineer with a strong foundation in web development, data science, and machine learning. My knowledge encompasses core concepts of data structures and algorithms, as well as a sound knowledge of RDBMS. Proficient in programming languages like C++, Python, and JavaScript, I'm dedicated to creating innovative solutions and solving complex problems. With a commitment to continuous learning, I'm looking forward to contribute to cutting-edge projects and collaborate with like-minded individuals.

EDUCATION

SRM Institute of Science and Technology

Bachelor of Technology
2019– 2023

SKILLS

- C++
- Python
- Data Structures and Algorithm
- RDBMS
- Tensorflow
- Scikit-Learn
- HTML 5
- CSS 3
- Javascript
- React Js
- MongoDb
- Express Js
- NodeJs
- Postman
- Github

CERTIFICATIONS

- Backend and APIs Certification
- Ui Ux Design Hybrid from Figma to HTML, CSS and Javascript Certification
- Python for Data Science and Machine Learning Bootcamp Certification

PROJECTS

Using Machine Learning for early detection of money laundering schemes

Collaborated with a team of fellow students to develop and implement the machine learning model in order to identify patterns which could indicate a money laundering activity using supervised learning techniques.

Data Science and Machine Learning Course Projects

Build several small projects during my Data Science and ML learning journey implementing various python libraries and ML algorithms.

Note Taking App using MERN Stack

Developed a fullstack web application using NodeJs and ExpressJs for backend and Reactjs for frontend, Used MongoDb for storing users' details(login credentials) and notes.

Generative Ai Discord Chatbot

Build a discord bot in python using the OpenAi's API to hold human like conversations. Also gave the bot and the prompter personalities and a fun context for casual conversations.

Meme Generator Browser Extension using React

A simple browser extension that allows you to use any image on the web as your meme content without the need for downloading the image first.
